pre-1978 registrations

The following is a list of pre-1978 registrations which have not appeared in an earlier issue of the Catalog of Copyright Entries. These works are assigned registration numbers in the classification system in use in the Copyright Office before January 1, 1978.

An index of names and titles associated with the work is followed by the main entries, listed in order by registration number. Filing of the index is letter by letter, except in the case of inverted names which are filed up to the comma or parentheses, after which letter by letter filing is resumed. The entries are formulated in a single paragraph without ISBD (International Standard Bibliographic Description) punctuation. Some elements of information described in the Introduction to this part of the Catalog of Copyright Entries are not included in the entries for pre-1978 registrations.
